

YOUR VOLUNTARY COOPERATION IS REQUESTED FOR YOUR BENEFIT

Suggestions by Rob Johnston, water system operator VOLUNTEER attempting to provide the membership with the best possible water service regarding volumes & pressures in a cost effective manner, taking a preventative pro-active approach.

Also, by scheduling basically HALF of the subdivision to irrigate on one day and the other HALF to irrigate on the opposite day, both during "Night time" periods. The system will work in a more continuous "ON" situation over that designated period of time of heavy demands related to irrigating (THUS providing higher pressure for your irrigation system) which also is the best operating situation for a water pump, Vs. a random "ON/OFF" situation, which is the worse operating situation for a water pump.

PLEASE MAKE EVERY EFFORT TO SET YOUR IRRIGATION TIMERS ACCORDING TO THE SCHEDULE BELOW.

Schedule:

Please see map attached with physical address written on it and a NUMBER assigned to your Lot for Schedule.

**#1's** water schedule Mondays, Wednesdays and Fridays between the hours of **10 pm to 5 am** for those members with **AUTO** sprinkler systems. **MANUAL** sprinkler systems can water between the hours of **5 am to 10 am and 4 pm to 10 pm**.

Note: P.M. watering allows water to soak into ground, Vs A.M. watering there is evaporation.

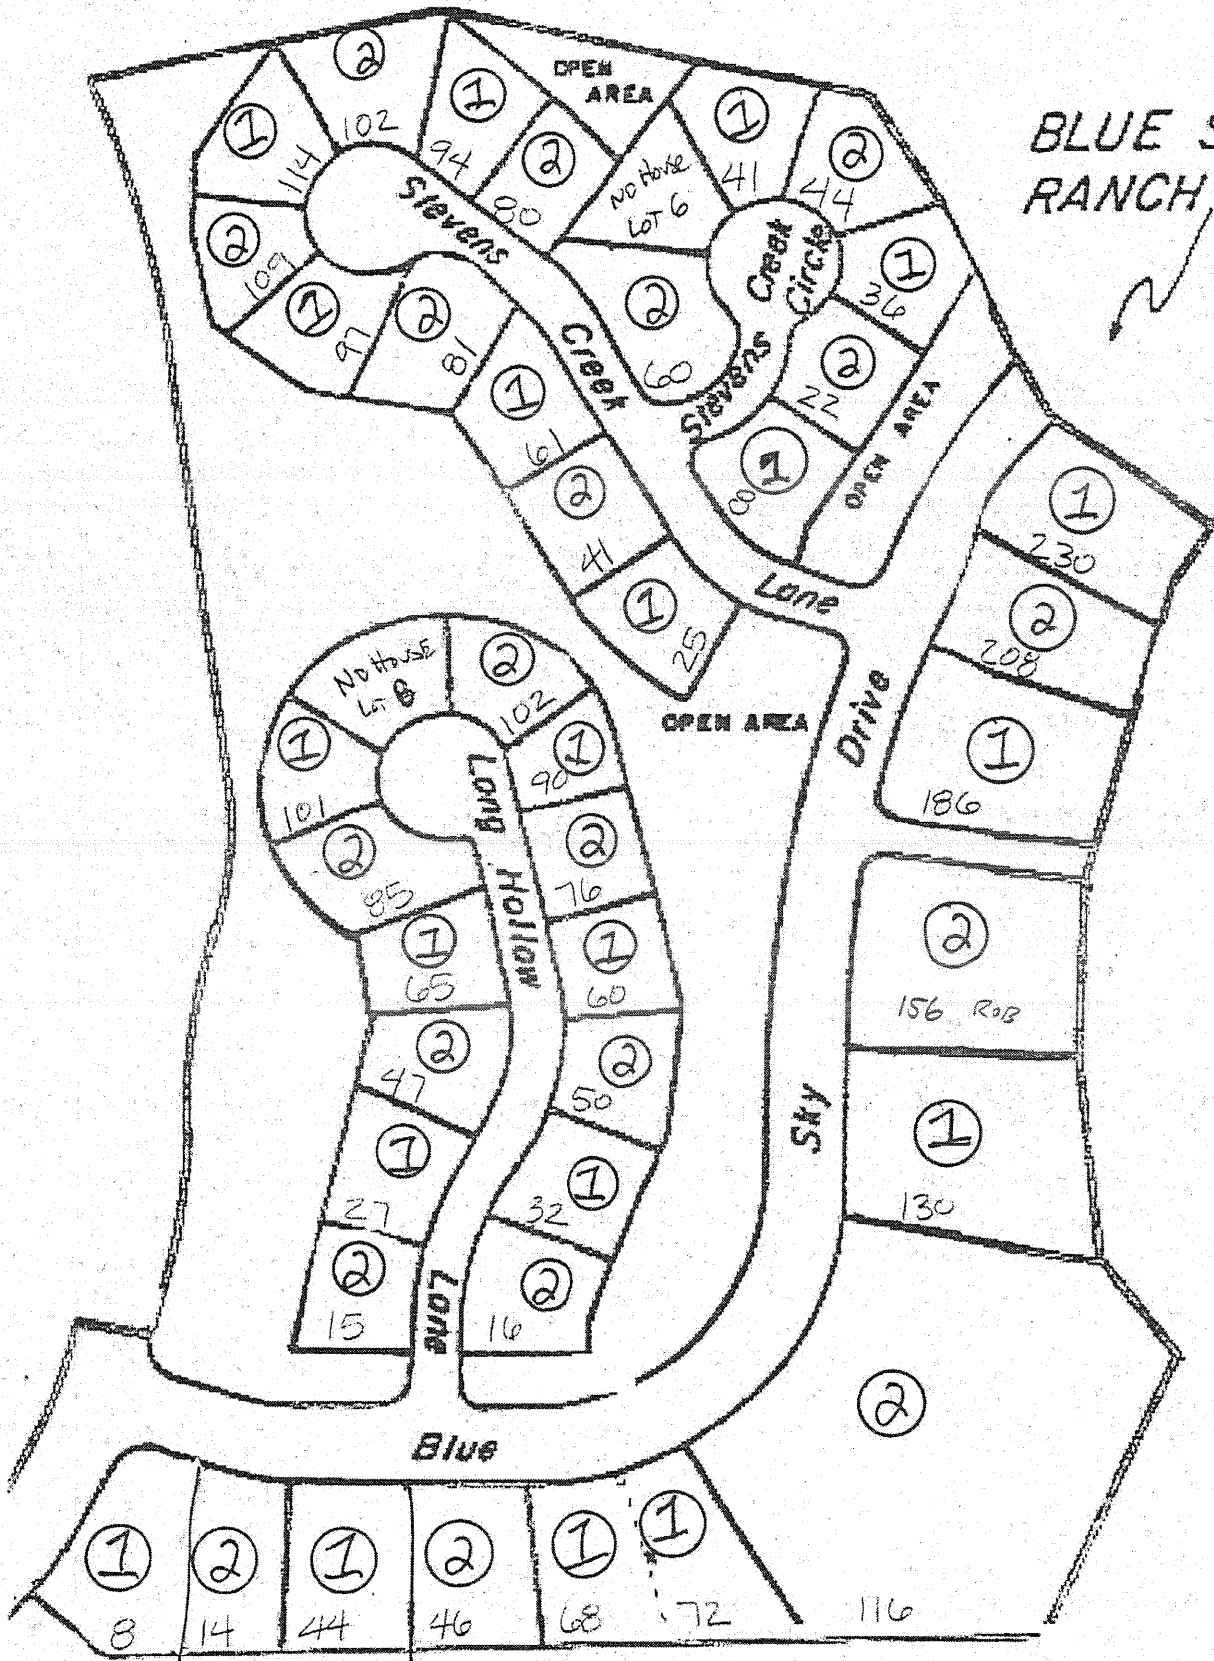

**#2's** water schedule Tuesdays, Thursdays and Saturdays between the hours of **10 pm to 5 am** for those members with **AUTO** sprinkler systems. **MANUAL** sprinkler systems can water between the hours of **5 am to 10 am and 4 pm to 10 pm**.

Note: P.M. watering allows water to soak into ground, Vs A.M. watering there is evaporation.

Thank you very much in advance for your cooperation which is for all our benefit.

Questions or concerns about water please call Rob 759-0444 cell or email to:
